

Prater Limited recognises the importance of protecting the environment. The Board of Directors are committed to ensuring that the systems and resources are in place to reduce and mitigate impacts upon the environment and allow the company to successfully achieve environmental objectives.

We operate a comprehensive and effective management system, certified to ISO 14001:2015, which is monitored and measured to ensure its continued relevance and accuracy. We want to ensure we are delivering to the very highest standard, and challenging the expectations of our customers.

**Prater will adhere to the following key principles:**

1. The Board of Directors will foster a culture of continual improvement by setting, measuring and periodically reviewing environmental objectives following their annual Strategy meeting.
2. Understand and actively support all client environmental requirements, targets and initiatives
3. Engage our supply chain to explore opportunities to reduce environmental impact and increase sustainability through product innovation, reduced, recycled and reused packaging, and streamlining of deliveries
4. Identify significant aspects and impacts and take measures to protect the environment. This includes, but is not limited to, the prevention of pollution, and the reduction of waste, odour and noise.
5. Clearly understand legal requirements and ensuring processes are in place to ensure continued compliance through monitoring and measurement.
6. Provide the channels through which our people can report any potential issue, poor practice or opportunity for improvement to avoid any environmental impact, or mitigate risk.
7. Undertake regular environment audits of our projects and business functions to monitor and measure the environmental performance of the business.
8. Work in partnership with suppliers and manufacturers, clients, architects, engineers and other experts to embrace innovation, improve standards and increase awareness in the industry.
9. Communicate this policy and the environmental objectives to all staff, encouraging them to actively develop and improve the management system. A company-wide understanding and commitment to the environment will lead to improvements that will benefit the business, its employees, and its customers.
10. This policy will be available and maintained as documented information, and made available to relevant interested parties, as appropriate.
